

1

## MEDICATION ERROR REPORTING

- **Critical in preventing future medication errors**
- **Most Boards of Pharmacy require hospitals & medical facilities (including pharmacies) to report med errors**
- **NMBOP requires reporting of significant adverse drug events**
- **"Significant Adverse Drug Event"** a drug related incident that results in harm to the patient.

2

## 16.19.25 ADVERSE DRUG EVENT

- **Incident** - a drug that is dispensed in error, that is administered and results in harm, injury or death
- **Harm** - temporary or permanent impairment requiring intervention

**The Pharmacist in Charge shall:**

- Develop and implement written **error prevention procedures** as part of the Policy and Procedures Manual.
- Report incidents**, including relevant status updates, to the Board on Board approved forms within fifteen (15) days of discovery.
  - "Significant Adverse Drug Event Reporting Form"

**The Board shall:**

- Maintain **confidentiality** of information relating to the reporter and the patient identifiers.
- Compile and publish, in the newsletter and on the Board web site, report information and **prevention** recommendations.
- Assure reports are used in a constructive and non-punitive manner.

3

## MEDICATION ERRORS

- **BOP receives sworn Complaints Alleging Misfilled Prescriptions.**
- **Not generated from Adverse Drug Event Reports.**
- **Most of these would not have occurred if the pharmacist complied with BOP requirements for:**
  - **Prospective Drug Review**
  - **Counseling**

4

## Prospective drug review

(1) Prior to dispensing any prescription, a **pharmacist** shall review the patient profile for the purpose of identifying:

- clinical abuse/misuse;
- therapeutic duplication;
- drug-disease contraindications;
- drug-drug interactions;
- incorrect drug dosage;
- incorrect duration of drug treatment;
- drug-allergy interactions;
- appropriate medication indication.

Source: NMAC 16.19.4.16 (D)

5

## ONLY THE RPh CAN COUNSEL

All clerks and technicians are taught that if there is a question regarding a prescription, the RPh (or intern) must take the question.

6

## MEDICATION ERROR REDUCTION: PATIENT COUNSELING

Patients need to know:

- The name of the medication
- How to take it
- What it's for
- If the medication looks different, talk to the pharmacist

<http://www.fda.gov/ForConsumers/ConsumerUpdates/ucm096403.htm>  
accessed 6/3/16

7

## PATIENT COUNSELING

➤ **Estimate:** half of medication-related deaths could have been prevented by appropriate and timely counseling.\*

➤ **Show** the patient the drug while asking:

- 1) Tell me what you take this drug for?
- 2) Tell me how you take the medication?
  - how often, and
  - directions for taking the medication

[http://www.uspharmacist.com/continuing\\_education/ceviewtest/lessonid/105916](http://www.uspharmacist.com/continuing_education/ceviewtest/lessonid/105916)

\*Abood RR. Errors in pharmacy practice. *US Pharm.* 1996;21(3):122-130.

8

## REMEMBER THE PATIENT

• **Patients provide a major safety check**

- Counseling – not a “veiled offer”
- Wrong patient errors: Not opening the bag at the point of sale
- Risk of dispensing a correctly filled Rx to the wrong patient at POS – about 6 per month per (community) pharmacy

<https://www.ismp.org/newsletters/acutecare/showarticle.aspx?id=91>, 10/9/2014, accessed 6/3/2016

9

## “To Err is Human”

### Building a Safer Health System

• the majority of medical errors are caused by faulty systems, processes, and conditions that:

- lead people to make mistakes
- fail to prevent mistakes

**When an error occurs, blaming an individual does little to make the system safer and prevent someone else from committing the same error.**

10

## When an error occurs

- Be compassionate
  - ISMP persistent safety gaffe #4 respond with empathy and concern
- Evaluate and address medication use system issues
  - Root cause analysis

<https://www.ismp.org/newsletters/acutecare/showarticle.aspx?id=91>

11

## Root cause analysis (RCA):

- Process for identifying the basic or causal factors that underlie variation in performance, including the occurrence or risk of occurrence of a sentinel event.
- Focus is on systems and processes, not individual performance
- Identifying root causes illuminates significant, underlying, fundamental conditions that increase the risk of adverse consequences.
- RCA facilitates system evaluation, analysis of need for corrective action, tracking and trending

12

Table 1. Basic Questions to Answer During RCA

- |   |
|---|
| 1. What happened?   |
| 2. What normally happens?                                       |
| 3. What do policies/procedures require?                         |
| 4. Why did it happen?   |
| 5. How was the organization managing the risk before the event? |

13

#### Case Study:

- **Patient experienced sudden shortness of breath, chest pain (breathing worsened pain), dizziness, lightheadedness, anxiety and heart palpitations**
- **Patient went to ER, treated for a submassive pulmonary embolism.**
- **Admitted and Discharged after 5 days with prescriptions for atorvastatin 80 mg, Toprol XL 25 mg, lisinopril 5 mg and apixaban (Eliquis) 5 mg**
- **Hospital sent Rxs electronically to pharmacy**

14

#### • Case Study continued:

- **Pharmacist dispensed medications and counseled patient.**
- **Patient received an automated message that a prescription was ready 5 days later.**
- **Went to pharmacy and received apixaban prescription. Claimed not aware of apixaban Rx.**
- **Physician upset and contacted pharmacy about delay. RPh said did not dispense apixaban because did not have full quantity to fill Rx and patient said he would wait.**

15

#### • Case Study continued:

- **Pharmacist's actions appropriate? Was this a misfilled prescription?**
- **Does patient have enough knowledge of medications to know which are critical? What does the pharmacist have?**
- **Pharmacist's other options.**
- **- Partial fill...what else?**

16

### FDA Guidance – Insanitary Conditions

- Putting on gowning apparel in a way that may cause the gowning apparel to become contaminated
- Leaving the cleanroom and re-entering from a non-classified area without first replacing gowning apparel
- Performing aseptic manipulations outside of a certified ISO 5 area
- Failing to disinfect containers of sterile drug components or supplies immediately prior to opening
- Lack of adequate routine environmental monitoring - nonviable airborne particulate sampling; viable airborne sampling; and surface sampling, including but not limited to equipment, work surfaces, and room surfaces

17

### Insanitary Conditions - Continued

- Lack of adequate personnel sampling (including glove fingertip sampling)
- Lack of routine certification of the ISO 5 area, including smoke studies performed under dynamic conditions
- Lack of HEPA-filtered air, or inadequate HEPA filter coverage or airflow, over the critical area
- Buffer room or ISO 5 areas that contain overhangs or ledges capable of collecting dust (pipes and window sills)
- Failing to appropriately and regularly clean and disinfect (or sterilize) equipment located in the ISO 5 area
- Lack of disinfection of equipment and/or supplies at each transition from areas of lower quality air to areas of higher quality

18

**Serious conditions - FDA recommendation includes immediate recall and cease sterile operations**

- Vermin (e.g., insects, rodents) or other animals (e.g., dogs) in ISO 5 areas or areas immediately accessible to production
- Visible microbial growth (e.g., bacteria, mold) in the ISO 5 area or in immediately adjacent areas
- Sources of non-microbial contamination in the ISO 5 area (e.g., rust, glass shavings, hairs, paint chips)
- Performing aseptic manipulations outside of a certified ISO 5 area
- Personnel aseptic practices that are a contamination hazard to an exposed sterile drug product or its constituent sterile components
- Exposing sterile drugs and materials to lower than ISO 5 quality air for any length of time. (i.e. exposing partially stoppered drug products or stock solutions in a container/closure system that is not fully closed)

19

**Serious conditions - FDA recommendation includes immediate recall and cease sterile operations**

- Cleanroom areas with unsealed or loose ceiling tiles
- Production of drugs while construction is underway in an adjacent area
- Consistent and frequent pressure reversals from areas of less clean air to areas of higher cleanliness
- Using a filter for the purposes of product sterilization that is not appropriately graded for sterilization, not appropriate for pharmaceutical use, or used in excess of its volume or pressure capacity
- Using parameters for sterilization (e.g., temperature, pressure, time) that are not lethal to resistant microorganisms

20

# Pharmacy Crimes

21

## Rogue Online Pharmacies

Consumer protection program operated by NABP:

 **safe.pharmacy**

Discovered:  
40,000 websites fail to comply with NABP patient safety and pharmacy practice standards or applicable laws

95% of websites offering prescription-only drugs online operate illegally

89% of illegal online pharmacies did not require a prescription

22

**BUY SAFELY**

**Before You Buy, Verify**

Be aware of fraudulent and unsafe prescription medication sold on websites and social media platforms

Search for a website to see if it is safe or not recommended

[www.safe.pharmacy.com](https://www.safe.pharmacy.com)

**Safe Online Pharmacies**

It is essential to stay informed about safe ways to buy medication. Buying prescription medicine online or through social media may seem to cost less, but it can put you, or your loved ones, at risk. Make sure a website is reputable to safely order prescription drugs and medicine online.

- Search engine for name of website or download an excel list

28

## Pharmacy Robberies Albuquerque

- April 29, 2015 - Six Albuquerque Residents Indicted on Federal Robbery, Firearms, and Prescription Drug Trafficking Crimes Arising Out of Pharmacy Robberies –FBI.gov
- 3 fugitives at time of indictment
- Last suspect (Blake Gallardo) was arrested June 11, 2015
- Stole over 68,000 tablets of oxycodone

29

## Pharmacy Safety

30

### Scam Phone Calls – BOP, DEA, FBI or other LE

- Callers identifying themselves as Board of Pharmacy Investigators, Inspectors or Agents
- Callers "spoofing" the Board of Pharmacy phone number
- Told licensees they are under investigation and their license may be suspended or arrest warrant was issued and they demand money. Also, inquired about their wholesale distributors.
- NMBOP will never contact licensees by telephone to demand money or payment of any form.

31

### Scam Phone Calls

- Do not give them money!
- Do not give them any information!
- Contact an inspector or e-mail [pharmacy.board@rld.nm.gov](mailto:pharmacy.board@rld.nm.gov) to inquire if there is an official investigation being conducted
- If the caller is stating they are from the DEA, you can report the scam using the [DEA Extortion Scam Online Reporting Form](#)
- If the caller is stating they are from the FBI, you can report the scam using the [FBI Internet Crime Complaint Reporting Form](#)
- If the phone number of the caller appears to be a New Mexico Board of Pharmacy telephone number, you can report the scam using the [Federal Communications Commission Consumer Complaint Form](#)

51

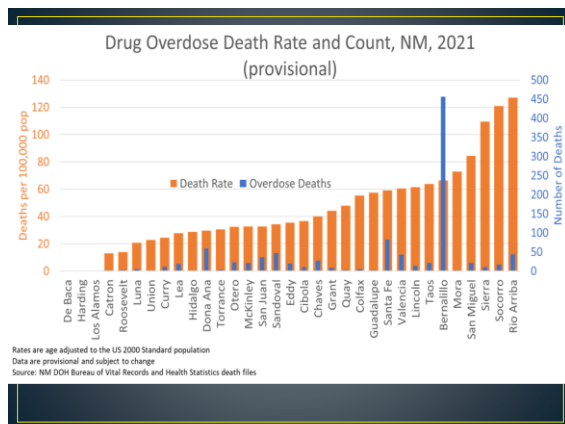

52

**FDA Gabapentinoid Warning! - 12/19/2019**

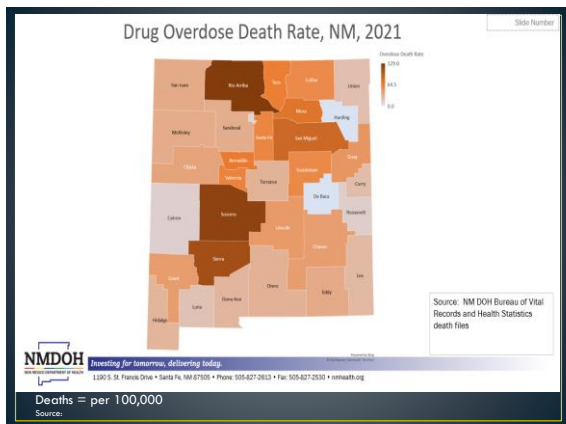

- Serious Breathing Difficulties may occur in patients using gabapentin or pregabalin who have respiratory risk factors.
- Risk Factors include:
  - Use of opioid pain medications
  - Use of CNS depressants – anti-anxiety meds, antidepressants, antihistamines
  - COPD or other underlying respiratory disease
  - Elderly patient

FDA advice for HCPs - start gabapentinoids at lowest dose possible and monitor for symptoms of respiratory depression and sedation when co-prescribed with an opioid or other CNS depressant

53

54

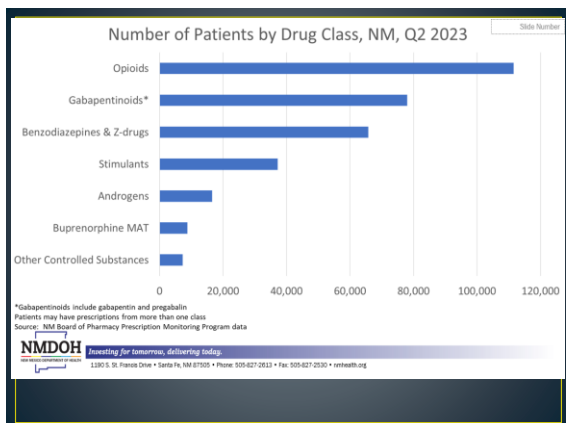

55

### High Risk Prescribing Patterns

- Long term use of opioids ( $\geq 90$  days)
- High doses of opioids ( $\geq 90$  MME/day)
- Overlapping prescriptions of opioids from different prescribers
- Multiple Provider Episodes (MPE: Doctor and pharmacy shopping)
- The combination of opioids and sedative-hypnotics
- The combination of opioids, benzodiazepines and muscle relaxants
